

Hope everyone is doing well. I hope that all of you must be going through the resources shared earlier, and having fun learning. For those of you who joined late, here is the link for this week's resources and the assignment with it. The deadline is \*30th May\*, and due time constraints, there shall be no extensions to this deadline and hence it is the duty of the auditors and mentees to ensure timely submission to be considered for ratification.

[https://www.notion.so/BRAINS-\\_MENTEES-1fb06a7d803b80aeab86e88d03a36e58?pvs=4](https://www.notion.so/BRAINS-_MENTEES-1fb06a7d803b80aeab86e88d03a36e58?pvs=4)

The evaluation criteria will be:

Assignments will be classified into one of the four categories: 1) Satisfactory, 2) Needs Improvement, 3) Incorrect, 4) AI Generated

1) For mentees: For ratification, if there are n assignments in the project (besides the final project), you will be evaluated on the best (n-1) and they all need to be 'Satisfactory'.

2) For auditors: Anyone who has joined the group without the recruitment test is an auditor. Auditors will be evaluated on all of the given n assignments and getting a 'Satisfactory' remark on it, along with the final project for ratification. This criteria shall be strictly followed, with no relaxation under any circumstances.

Note:

1) The final project is necessary for both, the mentees and auditors alike, for ratification.

2) Getting the 4th category on any assignment would affect your ratification chances very negatively.
